alden ONE

RELEASE NOTES

21.3

Documenting **ENHANCEMENTS & BUG FIXES** for Alden One this Release

June 2021

NEW
FEATURES

NEW FEATURES THIS RELEASE

o   Add Pro/Basic User designation in Alden One

o   Allow a user to see poles (not on the conversation) on the conversation map based on criteria as a different shape or color

o   Update application startup for performance

o   Add "Country" to the registration page; change the "State" dropdown to say "State/Region"

o   Add Activity Tracker functionality to Alden One

o   Add tabs for docs, notes and photos on a utility pole and make the tabs permission based

BUG

FIXES

BUG FIXED THIS RELEASE

- ✓ Browser becomes unresponsive when switching tabs
- ✓ Map zooms in too far, cutting out valid results
- ✓ Map on the printed view of a conversation is not showing the same thing that the map does on the conversation
- ✓ Document header attribute saves and refreshes screen, requiring user to re-enter data that gets cleared out
- ✓ Validations on some conversation types causing max call stack exceeded errors and degrading performance
