RELEASE NOTES

23.2

Documenting **ENHANCEMENTS & BUG FIXES** for Alden One this Release

April 2023

NEW
FEATURES

- o Add ability to save custom attribute values when a Utility Pole Attachment is manually created.
- o Allow company administrators to configure what asset attributes to display on the Search Results Map and Quick View Cards for their company's users.
- o Add Attached Date attribute to display in the list of attachments on the Attachments tab on a Utility Pole.
- o Show pole tag, power number, and telco number on Conversation asset line editor for copies of Poles.
- o Report Viewer enhancements – Added ability to show/hide report parameters and display parameters in two columns.
- o Child conversations created by stored procedure did not retain the value of the IsReadOnly attribute on SMContacts and SMCompanies.

BUG
FIXES

- ✓ When opening a calendar date picker in Line Edit, the calendar dates were not legible.

- ✓ Attachment records disappeared when pole records were hidden on a conversation and then column sort was applied.

- ✓ Custom attributes were not retrieved and displayed on an open Vault asset.

- ✓ Child conversations created by @Spawn macro did not retain the value of the IsReadOnly attribute on SMContacts and SMCompanies.
