

RELEASE NOTES

23.4

Documenting **ENHANCEMENTS & BUG FIXES** for Alden One this Release

August 2023

NEW FEATURES THIS RELEASE

NEW FEATURES

- Data control on the Line Editor is hard to use.
- Menu options are truncated if the browser window height is insufficient.
- Show Calendar view in search results when searching for only Conversations.
- Add the ability to configure a search results field as a hyperlink to be able to easily navigate to related assets/conversations.
- Show pole tag, power number, and telco number on Conversation asset line editor for Sub-entities of a pole copy (applicable for Audit Conversations).
- Correctly update and display the Number Of Conversations associated with a pole in pole search results and poles on a conversation.
- Improve navigation by adding a new Accounting menu option to consolidate Contract and Accounting functions.
- Add folder structure to the Documents tab on Conversations and Assets (excluding Contracts).
- Remove unnecessary fields from the Company Profile Visualizer Configuration Options for Streetlights.
- Add the ability to add Streetlights on a Conversation.
- Added new fields as options for Contract header - Franchise Area, Region, County, Infrastructure, Billing Period Start Date, Billing Period End Date.

BUG FIXES

BUGS FIXED THIS RELEASE

- ✓ Contract header date fields sometimes shows incorrect day for users in various time zones.
- ✓ Reference Data not saving correctly when editing an existing record after new fields were added to the configuration.
- ✓ When using Show Vaults checkbox on assets page, sometimes Poles are displayed instead of Vaults.
- ✓ Cannot open an item in a Reference List to edit it after the first time it is opened.
- ✓ Start Date and Expire Date on Contract Line Items sometimes show incorrect day for users in various time zones.
- ✓ Value in Contract lookup field sometimes disappears when switching tabs in a Conversation.
- ✓ Unable to Clone conversation unless you are on the Header tab.
- ✓ Poles on conversation map are not displayed/hidden consistently when "Show Poles" map option is checked/unchecked.
- ✓ Saving on a conversation with many attributes on the Header tab sometimes causes the tab to scroll to the bottom of the tab.
- ✓ Cursor did not change to indicate a read-only field when hovering over lookup or date field.
- ✓ User Management displays list of users without expected filter applied after editing a user.
- ✓ Dialog title when adding a new note says Edit Note rather than Add Note.
- ✓ Columns did not sort correctly in Account Configuration Details, Utility Pole Attachments, Vault Occupants, and Vault Ducts.
