

RELEASE NOTES

23.5

Documenting **ENHANCEMENTS & BUG FIXES** for Alden One this Release

October 2023

NEW FEATURES

NEW FEATURES THIS RELEASE

- Add option on conversation map and pole search map to allow users to change what label is displayed.
- Remove Microsoft 365 as an option in Add To External Calendar function.
- Add a link to Aldne One support helpdesk in User Profile menu.
- Add paging and searching to Detailed History tab on conversations.
- Add paging and searching to the Notes tab on conversations.
- Add Last Billed Qty attribute to the Core contract template.
- Change the Region attribute on the Core contract template to a context lookup; change the Franchise Area and Infrastructure attributes to text fields.

BUG FIXES

BUGS FIXED THIS RELEASE

- ✓ Contract Quick Card sometimes displayed with the label text overlapping the value text.
- ✓ Documents referenced by a conversation header attribute could be deleted from the Documents tab.
- ✓ Editing a Reference List item displayed an incorrect success message indicating "Created" instead of "Updated".
- ✓ Create Contract dialog did not display drop-list values for some fields for some customers.
- ✓ Pole search results did not return values in the "On Conversations..." column as expected.
- ✓ Conversation search results did not return custom attribute values as expected.
- ✓ Conversation map displayed multiple poles for the poles already added to the conversation when Show Poles was checked.
- ✓ Unexpected duplicate values sometimes appeared in drop-down lists on conversations.
- ✓ Users were unable to edit a Conversation Note Reply.
