# RELEASE NOTES

24.3

Documenting **ENHANCEMENTS & BUG FIXES** for Alden One this Release

June 2024

## NEW FEATURES THIS RELEASE

# NEW FEATURES

- **Color Coding for Streetlights on Map:** Users can now see Streetlights displayed in the search results map based on the attacher on each Streetlight, making it easier to identify streetlights available for attachment.
- **Streetlight Primary Attachment Company Facet:** The visibility of the 'Primary Attachment Company' facet in Streetlight search results has been updated to be consistent with private field display rules.
- **Family Tree Visualizer for Beta Users:** A new visualizer has been added to display the relationships between conversations, enhancing the user experience with a more intuitive interface.
- **User Account Settings Alignment:** The alignment of the Company Administrator section in User Account Settings has been improved for better visual consistency.
- **Added SourceID for Cell Structures:** The addition of a SourceID to cell structures and attachments has been implemented, aligning with other asset types for better data management.
- **Export to Excel to Include Private Columns:** The ability for asset producers to export private columns (such as Attacher Name) to Excel has been restored, providing them with complete data for analysis.
- **Improved Documents and Notes Code Performance:** Updates to the code for documents and notes have been made to enhance performance and reduce data call issues.
- **Updated Path for Conversation Help Image URL:** The image link for the "help on this type" page in conversations has been updated to ensure all images are displayed correctly.

# NEW FEATURES (CONT.)

- **Additional Logging for Timer Scenario:** To improve troubleshooting, additional logging information has been added for scenarios where an event code is found to be invalid.
- **Updated Information on Login Page:** The call-to-action on the login page has been updated to provide users with the most relevant information.
- **Email Template Modification for Company Registration:** The company registration email template has been modified to remove unnecessary information.
- **Data Upload Improvements:** Enhancements have been made to the data upload process, including changes to the Install Date handling and Notes field updates.
- **New Standard Pole & Attachment Import Procedure:** A new standard procedure for importing pole data has been created to streamline the process and reduce errors.
- **Cell Structure Attribute Length Check During Import:** A thorough review has been conducted to ensure all cell structure attributes meet the specified minimum and maximum length properties.

# BUG FIXES

## BUGS FIXED THIS RELEASE

- ✓ **Contract Creation Error:** An issue that caused a console error when creating new contracts has been fixed.
- ✓ **Empty Blue Page Issue:** An issue causing an empty blue page to appear when opening deleted items in Account Configurations, Rate Types, and Accounts has been addressed.
- ✓ **Sorting Error in Account Configuration Details:** A console error that occurred when sorting the Attribute Code column in Account Configuration Details has been corrected.
- ✓ **Calendar View Error:** An error causing a perpetual loading spinner in the Calendar view has been fixed, ensuring the feature works as intended.
- ✓ **Visibility of Show Deleted Button:** The visibility of the 'Show Deleted' button has been corrected to ensure it is available when expected.
- ✓ **Missing Menu Icons:** The user interface has been updated to add missing icons for some options in the "I Want To" menu.
- ✓ **Cell Structures Export to Excel Error:** An error that occurred when non-producers attempted to export Cell Structures to Excel has been resolved.
- ✓ **Filtered By Button Overlap:** The overlap issue with the 'Filtered by' button in conversation notes has been addressed, enhancing the layout of the interface.
- ✓ **Import Issues for Cell Structures:** Corrections have been made to ensure that imported values for Cell Structures are imported and displayed correctly in the user interface.

## BUGS FIXED THIS RELEASE

- ✓ **Incorrect Pole Attacher Codes List:** An issue with the list of Attacher Codes when adding new attachments to a pole has been corrected, ensuring accurate data selection.
- ✓ **Search Issue for Shared Cell Structures:** A fix has been implemented for an issue where companies were unable to search for cell structures that had been shared with them.
