

RELEASE NOTES

25.13

Documenting **ENHANCEMENTS & BUG FIXES** for Alden One this Release

December 2025

NEW PERFORMANCE ENHANCEMENTS THIS RELEASE

NEW PERFORMANCE ENHANCEMENTS

- **Retrieve Notes** – We have made a change to the query to retrieve notes that will enhance the speed at which notes load and prevent other locks in the database when loading a conversation.
- **GIS Imports** – The GIS import process has been refactored to prevent database locks and improve speed when importing.

NEW FEATURES

NEW FEATURES THIS RELEASE

- **Search by Time Frame** – We've incorporated the ability to search by time frame. You can now use search refinement to search by last X days or next X days when searching by dates.
- **Timers** – When configured to do so, timers can now accommodate holidays and business days.
- **Cancel Actions** – All conversations in their initial state can be canceled without having to fill out required fields.

BUG FIXES

BUGS FIXED THIS RELEASE

- ✓ **Pinned Quick Views** – Pinned **Quick Views** no longer duplicate when changing languages within the app.
