

RELEASE NOTES

26.8

Documenting **ENHANCEMENTS & BUG FIXES** for Alden One this Release

October 2026

NEW FEATURES

NEW FEATURES THIS RELEASE

- **Maintenance Area** - Added new “Maintenance Area” attribute to the utility pole that is available for all companies to use.
- **Directly Open Assets** - Added the ability to open an existing asset from the conversation grid. If there is a valid asset associated with the selected conversation asset, then the “Take Action” menu now has an “Open” button that will directly link users to the header for that asset.
- **Filtering Large Lists** - Added a new control to the interface that allows users to filter large lists. For attributes defined with this new control interface, users can type and search within the dropdown control to easily find the value they are looking for.

NEW ENHANCEMENTS THIS RELEASE

- **Account Billing Performance** - Improved performance on the Account Billing Info module to prevent multiple HTTP calls and allow for faster loading.

NEW ENHANCEMENTS

BUG FIXES

BUGS FIXED THIS RELEASE

- ✓ **Undo Actions** - Corrected an issue where some users were unable to perform the “Undo” action on a conversation and would see an error instead.
- ✓ **City on Poles** - Occasionally, when adding a pole to the map, the city field would populate with the neighborhood name. It is now corrected to only use the city. Additionally, zip codes are trimmed to only use 5 digits with no extension.
- ✓ **Sequence of Actions** - Corrected an issue in which the order of the conversation actions was not sequenced correctly when bulk updating conversations.
- ✓ **Contract Start Date Required** - Corrected an issue where the “Start Date” field was not showing as required (with a red outline) on a contract header in instances where it was required.

BUG FIXES

BUGS FIXED THIS RELEASE

- ✓ **Province & Available Company** - Corrected an issue on the registration page that prevented users from seeing the available companies list when a Province was selected.
