2. From the **Remove Pole** section, select the **Reason Code** drop-down and pick from the list.

NOTE: In most cases you will select **Retire**. This is the selection that will provide the information to the G/L (General Ledger) for capital dollars. **Remove from Inventory** and **Delete From Error** will not send information to the G/L.

To help you see removed poles, dot (.) **REM** will be added to the pole number.
